Engineers are preparing to move guests to new compute and storage infrastructure. Basic network and SAN connectivity have been established. Which of the following options are valid NEXT steps to prepare for guest migration to the new infrastructure? (Select two.)

A. Tag the live migration VLAN on the trunk to the new servers
B. Correctly size and provision NFS LUNs on the new storage
C. Zone HBAs
D. Prep mirror VMs on new hosts for data migration
E. Tag the SAN trunks with the correct guest network VLANs

Answer: ADQUESTION 410An administrator is implementing a private cloud that will be used as a test environment. To limit the number of guests per subnet to a maximum of 14, the administrator implemented a /20 network. Which of the following should the administrator use to assign the networks?

A. DHCP
B. Subnet
C. VLAN
D. Gateway

Answer: AQUESTION 411A Chief Information Officer (CIO) has summoned an administrator due to the datacenter power bill being significantly higher than normal. The administrator explains that a new array was installed for a 20TB CRM application. Which of the following solutions would provide a new performance benefit and also reduce power consumption?

A. SSD
B. SAS
C. SATA
D. FC

Answer: AQUESTION 412Cloud bursting can alleviate which of the following attacks?

A. Buffer Overflow
B. Brute Force
C. XSS
D. DDOS

Answer: DQUESTION 413An administrator is testing a new web server from outside of the corporate firewall. The administrator performs a test from a single PC and the web server responds accordingly. The administrator then provisions several virtual machines on a network behind NAT and uses them to perform the same operation on the web server at the same time, but thereafter soon discovers that none of the machines can reach the web server. Which of the following could be responsible?

A. IPS
B. Blacklisting
C. IDS
D. Whitelisting
E. Firewall

Answer: EQUESTION 414Which of the following would a company implement to provide authentication to multiple websites that are delivered through PaaS?

A. Federation services
B. MFA
C. Multi-factor authentication
D. RBAC

Answer: DQUESTION 415An administrator is responsible for managing a host that is part of a private cloud. The host has one physical quad core CPU. The administrator is tasked with creating a new guest that requires a single CPU. Which of the following actions should the administrator do?

A. Assign 1 virtual CPU to the Guest
B. Assign 1 virtual CPU to the Host
C. Assign 1 physical CPU to the Guest
D. Assign 1 physical CPU to the Host

Answer: AQUESTION 416Which of the following storage technologies is IP-based?

A. SCSI
B. DASC
C. FCP
D. NAS

Answer: DQUESTION 417An administrator has created a new virtual server according to specifications and verified that TCP/IP settings are correct. When the VM is powered on, however, an error message indicates that a network card MAC address conflict exists. Which of the following would resolve this issue?

A. Remove the virtual NIC and configure another one.
B. Add an additional NIC with a loopback interface.
C. Ping the IP address to determine the location of the conflict.
D. Change the MAC to ff:ff:ff:ff:ff:ff and obtain a new address.

Answer: AQUESTION 418An administrator is no longer receiving alerting messages from the web server platform that recently failed over to a new secondary datacenter due to a power failure. Which of the following is the cause of the problem?

A. Port 21 in only allowed inbound at the primary datacenter
B. Port 22 to the log server is blocked outbound
C. Port 162 in DMZ is blocked inbound
D. Port 162 in DMZ is blocked outbound

Answer: CQUESTION 419An organization wants to create a server VM that is segregated from the rest of the servers. Which of the following should the server administrator configure?

A. Virtual NIC
B. Trunk port
C. Virtual memory
D. VPN connection
