The branch office connects to the main office by using a VPN over DSL connection. The branch office contains 500 client computers that run Windows 8.1. All the computers are on the same subnet. You plan to upgrade the operating system on the computers by using Configuration Manager. During the upgrade process, you will maintain the user state and the files. You need to recommend a solution to reduce the amount of WAN traffic during the operating system deployments. What should you include in the recommendation? A. a cloud management gateway B. a distribution point C. a service connection point D. a cloud-based distribution point Answer: B Explanation:

[https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/deploy-and-manage-content#bkmk\\_distribute](https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/deploy-and-manage-content#bkmk_distribute)

QUESTION 108Your company has a main office and a branch office. You have a deployment of System Center Configuration Manager (Current Branch). The main office has a software update point. Currently, all client computers receive Microsoft updates from the main office. You need to ensure that the computers in the branch office receive updates from a local server. The solution must meet the following requirements: - Ensure that the updates are managed by using Configuration Manager. - Ensure that the computers in the branch office scan for updates against a local catalog. What should you deploy to the branch office? A. a software update point, a service connection point, and an Application Catalog website point B. a software update point, a distribution point, and a reporting services point C. Windows Server Update Services (WSUS), a service connection point, and a management point D. Windows Server Update Services (WSUS), a software update point, and a distribution point Answer: D Explanation:

Windows Server Update Services (WSUS), a software update point, and a distribution point Answer: D Explanation:

<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/download-software-updates>QUESTION 109You have a deployment of System Center Configuration Manager (Current Branch). All the users at your company access their email by using Microsoft Exchange Online. You need to prevent the users from connecting to their email from a jailbroken or rooted device. Which two items should you deploy? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. A. a conditional access policy B. a compliance policy C. custom Client Device Settings D. an email profile Answer: AB Explanation:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/manage-access-to-services>QUESTION 110You have a deployment of System Center Configuration Manager (Current Branch). You add the cloud management gateway connector point to the deployment. Which site system role can be configured to receive the traffic from the cloud management gateway? A. Service connection point B. Software update point C. Asset Intelligence synchronization point D. Endpoint Protection point Answer: B Explanation:

<https://www.systemcenterdudes.com/how-to-setup-an-sccm-cloud-management-gateway/>QUESTION 111Your company has a main office and a branch office. The branch office connects to the main office by using a VPN over DSL connection. The branch office contains 500 client computers that run Windows 8.1. All the computers are on the same subnet. You plan to upgrade the operating system on the computers by using Configuration Manager. During the upgrade process, you will maintain the user state and the files. You need to recommend a solution to reduce the amount of WAN traffic during the operating system deployments. What two components should you include in the recommendation? Each correct answer presents part of the solution. A. a cloud management gateway B. a distribution point C. a cloud-based distribution point D. a fallback status point E. a management point F. a state migration point Answer: BE Explanation:

<https://docs.microsoft.com/en-us/sccm/core/servers/deploy/configure/install-and-configure-distribution-points>QUESTION

112You use System Center Configuration Manager (Current Branch) to manage client computers that run Windows 7. You have a Microsoft Application Virtualization (App-V) package named App1. You need to deploy App1 to the computers by using Configuration Manager and ensure that the App1 runs. What should you do first? A. Install the App-V Sequencer on a reference computer. B. From the Configuration Manager console, create an App-V virtual environment. C. Deploy the App-V client to the computers. D. Configure the Enable App-V Client setting by using a Group Policy object (GPO). Answer: D Explanation:

<https://docs.microsoft.com/en-us/windows/application-management/app-v/appv-enable-the-app-v-desktop-client>QUESTION

113You have a deployment of System Center Configuration Manager (Current Branch) that was implemented by a user named Admin1. Configuration Manager includes the administrative users shown in the following table: You add a boot image named Boot1 to Configuration Manager. You set the security scope of Boot1 to Scope1. Which user can create a task sequence that uses Boot1? A.

User8B. User3C. User6D. User1  
Answer: B  
Explanation: <https://technet.microsoft.com/en-us/library/gg682108.aspx>

QUESTION 114  
You have a deployment of System Center Configuration Manager (Current Branch). You add the cloud management gateway connector point to the deployment. Which site system role can be configured to receive the traffic from the cloud management gateway?  
A. Service connection point  
B. Software update point  
C. Asset Intelligence synchronization point  
D. Distribution point  
Answer: B

QUESTION 115  
You have a deployment of System Center Configuration Manager (Current Branch). The domain contains the users shown in the following table. Support Techs is a member of the Administrators group on each client computer. Help Desk Users is a member of the Power Users group on each client computer. You need to deploy Configuration Manager agents by using a client push installation. The solution must use the principle of least privilege. Which user should you configure as the client push installation account?  
A. User1  
B. User2  
C. User3  
D. User4  
Answer: D  
Explanation: <https://technet.microsoft.com/en-us/library/bb632779.aspx>

QUESTION 116  
Hotspot Question  
You have a deployment of System Center Configuration Manager (Current Branch). You configure the Backup Site Server maintenance task to back up Configuration Manager to a local folder. You need to create a script to restart the Configuration Manager server after the backup completes. How should you create the script? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.  
Answer: Explanation: <https://docs.microsoft.com/en-us/scm/protect/understand/backup-and-recovery>

QUESTION 117  
Hotspot Question  
You have a deployment of System Center Configuration Manager (Current Branch). Configuration Manager has the boundaries defined as shown in the following table. Configuration Manager has the boundary groups defined as shown in the following table. You install a new distribution point named DP1, and you add DP1 to BG1 and BG3. For each of the following statements, select Yes if the statement is true. Otherwise, select False.  
NOTE: Each correct selection is worth one point.  
Answer: Explanation: <https://docs.microsoft.com/en-us/scm/core/servers/deploy/configure/define-site-boundaries-and-boundary-groups>
