QUESTION 121 You are managing a site collection in a SharePoint farm. You need to configure the minimum level of permissions necessary for users to manage lists in the site collection. What permission level should you configure?
 A. Limited Access
 B. View Only
 C. Edit
 D. Create
Answer: C
Explanation: The Limited Access permission level is designed to be combined with fine-grained permissions to give users access to a specific list, document library, item, or document, without giving them access to the entire site. However, to access a list or library, for example, a user must have permission to open the parent Web site and read shared data such as the theme and navigation bars of the Web site. The Limited Access permission level cannot be customized or deleted.

QUESTION 122 Hotspot Question A SharePoint environment was set up by using an automated installation script. Corporate policies prevent the use of wizards for installing and configuring server environments. You plan to provide information from an external business system as metadata values within the environment. Users are not permitted to access this business system directly and the data cannot be exported from the external business system into SharePoint. You need to ensure that users can access the metadata provided by the external system. Which service should you configure? (To answer, select the appropriate service in the answer area.)

Machine Translation Service Application

Managed Metadata Service Application

Search Administration Web Service for Search Service Application

Search Service Application

Secure Store Service Application

Security Token Service Application

State Service

Answer:

Machine Translation Service Application

Managed Metadata Service Application

Search Administration Web Service for Search Service Application

Search Service Application

Secure Store Service Application

Security Token Service Application

State Service

QUESTION 123 You are the farm administrator for a single-server SharePoint 2010 Foundation environment. The company plans to

upgrade to SharePoint 2013 Foundation. You need to ensure that the existing server meets the minimum requirements. Which three requirements must you meet? (Each correct answer presents part of the solution. Choose three.) A. 64-bit edition of Windows Server 2008 SP2 B. 64-bit processor C. 8 GB of RAM D. 80 GB of free disk space for the system drive E. 64-bit edition of SQL Server 2008
Answer: BCDE
Explanation: Installation Scenario Single server with a built-in database or single server that uses SQL Server Development or evaluation installation of SharePoint Server 2013 or SharePoint Foundation 2013 with the minimum recommended services for development environments.
Requirement: B: 64-bit, 4 cores Processor C: 8 GB RAM D: 80 GB for system drive
Incorrect: Not A: Minimum requirements for a single server with built-in database: The 64-bit edition of Windows Server 2008 R2 Service Pack 1 (SP1) Standard, Enterprise, or Datacenter or the 64-bit edition of Windows Server 2012 Standard or Datacenter
Note: no need of a SQL server (can use the builtin Sharepoint database server)
Reference: Hardware and software requirements for SharePoint 2013
QUESTION 124 You are managing a site collection in a SharePoint farm. You need to configure the minimum level of permissions necessary for users to manage lists in the site collection. What permission level should you configure? A. Edit B. Contribute C. Read D. Limited Access
Answer: A
QUESTION 125 Hotspot Question You are managing a SharePoint web application. The environment includes an Active Directory Domain Services (AD DS) domain. SharePoint site users authenticate by using their domain credentials. Members of an AD security group named Auditors require only the following permissions on the web application: - Open Pages - View Pages - Manage Lists - View List Items
You need to begin defining and assigning the permissions to the security group. In Central Administration, you select the web application. Which command should you choose? (To answer, select the appropriate command in the answer area.)

Answer:

QUESTION 126 Hotspot Question You are managing a SharePoint web application. The environment includes an Active Directory Domain Services (AD DS) domain. SharePoint site users authenticate by using their domain credentials. Members of an AD security group named Sales require Full Control permissions for the web application. You need to begin assigning the permissions to the security group. In Central Administration, you select the web application. Which command should you choose? (To answer, select the appropriate command in the answer area.)

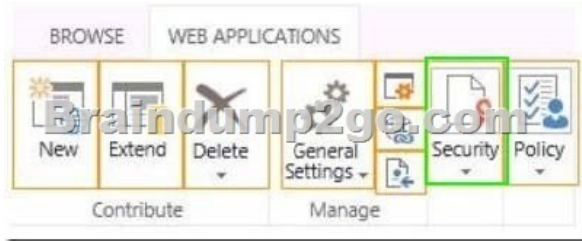

Answer:

QUESTION 127 You are managing a SharePoint farm. The SharePoint databases are configured to run on a dedicated instance of Microsoft SQL Server 2008 R2 Service Pack 1. You need to optimize query executions. What should you do? A. Move the master database to a RAID 10 volume. B. Set the maximum degree of parallelism for SQL Server instances to 0. C. Set the maximum degree of parallelism for SQL Server instances to 4. D. Set the maximum degree of parallelism for SQL Server instances to 1.
Answer: D
